

Instructions for Authors on References (APA style)

Authors

Authors should provide complete, correct and properly structured references, as instructed by the editors.

Complete data contains:

For article in a journal: Author(s), Title of the article, Journal name (full name or abbreviation according to ISO standard), Volume, Issue, Publication date, pagination.

For a book: Author(s), Title, Publisher, Publication place and date

If the article/book has DOI number, the author should include it in the references. DOIs are very easy to find. Most publishers, if they have them, place them at the top of the article front page. Please keep in mind that the DOI number will automatically make the active link !

All data in the reference must be correct. Most common errors are incorrect abbreviations of journal titles or wrong navigation data (like volume number or article pages) of the cited article.

Finally, the author ought to prepare references in a format chosen by the journal. The journal editors must instruct the author as appropriate (see below).

APA style

Article in a journal:

Lippke, S., & Ziegelmann, J. (2006). Understanding and modelling health behaviour change: The multi-stage model of health behaviour change. *Journal of Health Psychology*, 11(1), 37-50,
DOI:10.2478/s11533-007-0023-3.

Book:

Jones, E., Farina, A., Hastorf, A., Markus, H., Miller, D., & Scott, R. (1984). *Social stigma: The psychology of marked relationships*. New York: W. H. Freeman.

This document describes standards for preparing the references in the APA style. The following sections give detailed instructions on citing books, journal articles, newspaper articles, conference papers, theses, webpages and others.

Please provide all the required elements in the references to your paper. Please pay particular attention to spelling, capitalization and punctuation. Accuracy and completeness of references are the responsibilities of the author.

Before submitting your article, please ensure you have checked your paper for any relevant references you may have missed.

A complete reference should give the reader enough information to find the relevant article. And most importantly, complete and correct references may allow automatic creation of active links by the MetaPress technology that we use for making the electronic version of our journal. Active reference linking is regarded as the greatest benefit of electronic publishing and it adds a lot of value to your publication.
